23. Problem: (use additional Sheets if necessary) The Remedy Inventory, Logistics, and Maintenance (ILM) application/database on ilmserv needs to be accessible to users outside of the EDF for ILM intersite data exchange purposes. Recent testing in the PVC revealed that ilmserv, currently installed inside the EDF firewalls, is not readily accessible to external Remedy ILM users using the PVC PC (p0dip04) or the VATC PC (t1dpp02).						
24. Proposed Solution: (use additional sheets if necessary) Move ilmserv into the DMZ associated with the EDF's Firewall B and make ilmserv to accessible to external users (e.g., EDF, PVC, VATC, DAACs Remedy ILM users).						
25. Alternate Solution: (use additional sheets if necessary) None						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary)						
27. Justification for Emergency (If Block 15 is "Emergency"): This move is needed to support Remedy ILM acceptance testing activities starting on July 29, 2003. Test includes verification of the ILM intersite data exchange capability and this necessitates PVC PC (p0dip04) and VATC PC (t1dpp02) communicating with ilmserv.
